DO IT YOURSELF “DIY” FIBERGLASS POOLS INSTALL

LEISURE POOLS USA OFFERS DO IT YOURSELF POOLS

We have many dealers spread over the country who can install your stunning new Leisure Pool on a turnkey basis or assist you with a DIY installation (if we do have an established dealer in your in your area we will refer you to that dealer). In areas we do not have a dealer; we can still assist you with a DIY installation. Being your own pool builder can be an exciting and gratifying experience.

Some of the many benefits of doing the project yourself are:

Savings

Successful homeowner-builders generally have a strong desire to save money. How much money you can save depends on the amount of the actual work you want to do yourself and what you will contract out. Typical do it yourself pool installations can save thousands of dollars.

Satisfaction

If you are willing to invest the time, there is very little that can compare to the satisfaction of creating your own family’s dream of a back yard oasis. From leveling the pool to completing the landscaping, each step of the way, every accomplishment will provide you with enjoyment and pride. You will have total control of the outcome of your pool project by having the ability to choose what sub-contractors you wish to assist you in some or all phases of construction.

Simple Installation

One of the reasons that Leisure Pools are often preferred by do-it-yourself and professional pool installers is the ease of installation. Leisure Pools pioneered the use of “laser lined pool molds” where each pool mold is shot with lasers before going into production. This process provides ease of leveling and ensures a well done and beautiful pool installation.

Easy Instructions

Included with your Leisure Pool is an easy to follow installation manual. The manual will walk you through the simple steps and techniques of installing your pool from beginning to end. Additionally Leisure Pools provides phone support directly from the factory on any questions you may have during the installation process.
