Digging begins

Screeding the bed

Compacting the bed

When it comes to choosing a pool, your independent dealer will come to your home. After all, that is where your pool's going to go and it's also where you will feel at ease.

You will be shown perfect small scale models of pool styles to help you visualize which one will best suit your needs and your location. Your dealer will also show you accurate samples of colors and textures, to ensure you make the most informed decision possible.

At the same time your dealer will personally assess and advise you on the best options for positioning and installing your pool into your yard. Even if you think your yard is inaccessible, relax our vast expertise can probably find a solution.

Once your order has been placed, an independent dealer (in your area) will assist you with permits and installation. You can be swimming in your new Leisure Pool just a few days after they start its installation and that means there is a minimum of disruption to your everyday lifestyle.

Even though the whole project can be completed within a few weeks, it still constitutes major construction. To give you a feel of the process we have photographed a typical installation so you know what will happen, and pictures speak a thousand words.

The pool arrives
